[3PS_PS] Poster Session of Diversity Promotion Committee

[3PS_PS] Poster Session of Diversity Promotion Committee

The Diversity Promotion Committee will hold a poster session aimed at providing a forum for information exchange and network formation that transcends the boundaries of affiliation and occupation, aiming for sustainable development of society by utilizing human resources with diverse values, abilities, experiences, and personalities. The poster session will introduce changes in the environment and technologies in the nuclear industry, as well as past, current, and future views of participants. Following the poster session, an information exchange meeting will be held on changes in the university and workplace environment, and how technology should be passed on. Attendance is open to all registered attendees of the Fall Meeting. And we look forward to the participation of people of a wide range of ages.
