

## Slab-derived fluid infiltrating back-arc mantle

\*Junji YAMAMOTO<sup>1</sup>

1. Kyushu University

Keywords: slab, mantle transition zone, nitrogen isotope ratio, xenolith, fluid inclusion

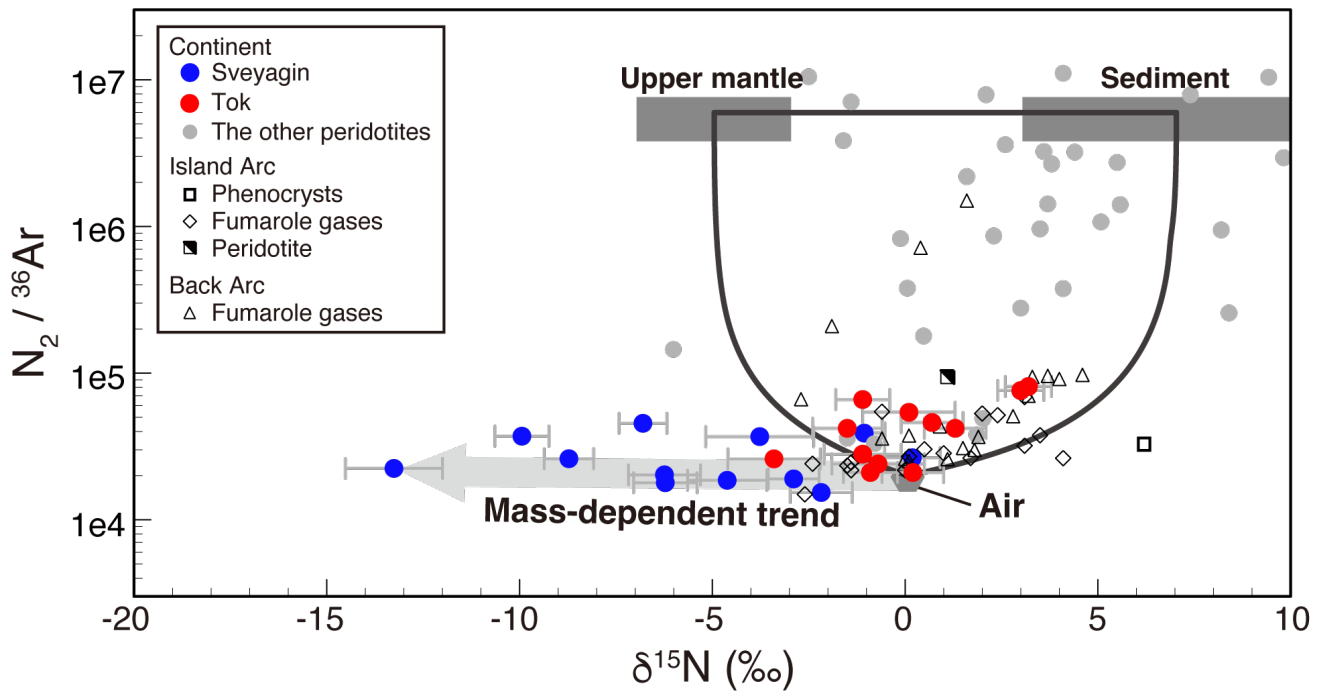

Fig. 1.  $\text{N}_2/^{36}\text{Ar}$  vs.  $\delta^{15}\text{N}$  of Far Eastern Russian xenoliths with data referred from earlier studies (see Yamamoto et al. (2020) EPSL).
