[EV-05] JpGU Super Lesson

Sun. May 21, 2023 3:30 PM - 5:00 PM Exhibition Hall Special Setting (4) (Exhibition Hall 8, Makuhari Messe)

Registration Form

These are lecture courses to support not only students but also mid-career and veterans who want to study a method in data analysis and experiment that they have never touched before. This time, we will offer a variety of 9 lessons, both free and paid.

3:30 PM - 5:00 PM

[E-11-06] JpGU Super Lesson: Let's use a large-size digital globe in your school and outreach events

*Akinori Saito¹ (1. Kyoto University)

The digital globe "Dagik Earth" is a system that easily provides a three-dimensional display of the earth and planetary science data. Its 2m or 4m spherical screen allows visitors to experience the Earth as seen from space. In this course, we will introduce the equipment and how to create content for two possible uses: (1) classes and events at schools and (2) outreach events at universities and research institutes. Science clubs and teachers at elementary, junior high and high schools, and universities and research institutes who are interested in exhibits to the public are welcome.

* Event language is Japanese.

***This will be held on-site only.**
