[EV-04] Lunchtime Special Lecture

Tue. May 28, 2024 12:30 PM - 1:40 PM Stage Area (Exhibition Hall 6, Makuhari Messe)

12:30 PM - 1:05 PM

[EV04-05]Search for our origin in space

Yasuhiro Oba¹ (1. Institute of Low Temperature Science, Hokkaido University)

It has been proposed in early 90's that organic molecules in extraterrestrial materials played an important role for the origin of life on the early Earth. In this talk, I would like to introduce what kind of organic molecules are present in extraterrestrial materials and how they were formed in space mainly based on my own research.
