[EV-04] Lunchtime Special Lecture

Tue. May 28, 2024 12:30 PM - 1:40 PM Stage Area (Exhibition Hall 6, Makuhari Messe)

1:05 PM - 1:40 PM

[EV04-06]Solar system exploration to exoplanets

Shingo Kameda¹ (1. College of Science, Rikkyo University)

I have been developing scientific instruments for the asteroid explorer Hayabusa2 and the Martian Moons eXplorer (MMX), etc.

In addition, I am working on the development of an ultraviolet spectrometer for observing the atmospheres of terrestrial exoplanets.

In this talk, I will introduce these activities and discuss the future of solar system exploration and space telescope missions.
