[U-09] What is the true value of Knowledge Creation?

convener:Michiyo SHIMAMURA(Osaka University), Yuko Onishi(Doshisha University), Mark Mocettini Shimamoto(American Geophysical Union), Kiyoshi Suyehiro(Japan Geoscience Union), Chairperson:Yuko Onishi(Doshisha University), Kiyoshi Suyehiro(Japan Geoscience Union)

Tue. May 27, 2025 9:00 AM - 10:30 AM Exhibition Hall Special Setting (1) (Exhibition Hall 7&8, Makuhari Messe)

There is a wide range of research, however, the expectations for "research that meets the needs of society" have been rising. In this series of session, we have been discussing the value of knowledge creation since 2020 under the following themes in collaboration with the AGU.

2020: The Ideal and Reality of Research Evaluation

2021: Researchers' awareness and accountability for the mandate of society

2022: The role-sharing between us and Funding Agencies

2023: Our perceptions of science and society

2024: Science and Society, Collaboration and Evaluation

Last five years, the Union Session has consisted of overseas case study reports and panel discussions, and pre and/or post-session questionnaires have been conducted. In this session, we will promote substantive discussions on the "future prospects of research evaluation" considering research diversity, with "research evaluation" and "society" as the main focus through sharing these results with JpGU members.

9:40 AM - 10:30 AM
