1. Osaka University, 2. JpGU, 3. Doshisha University

In the “Knowledge Creation” session series, a union session consisting of overseas case reports and panel discussions was held in collaboration with AGU starting in 2020, and pre- and post-session surveys were conducted for conference participants, mainly JpGU members (in 2021, only sessions were held and no surveys were conducted).

In this poster presentation, summary of the each questionnaire survey results will be reported. Also based on the findings of this series of surveys, we would like to offer our views on what is next for the earth and planetary science community.
