#### [II-AHAJS-03] Management of Complex Arrhythmias in ACHD

○Kara S. Motonaga (Department of Pediatrics, Division of Pediatric Cardiology, Stanford University, USA)

With advances in surgical repair techniques, the majority of patients with congenital heart disease are surviving to adulthood. Arrhythmias in adult congenital heart disease remain an important cause of increased morbidity and mortality in this population. In this talk, we will review current medical, ablation, and device management strategies for complex arrhythmias in this difficult population.
