[PG02] ポスター発表（一般 B:コアタイム1）

Sat. Mar 30, 2024 11:30 AM - 12:30 PM Sakura (Regular) (Sakura)

[PG02-21]有用きのこの小蛾類害虫の形態・分子情報に基づく識別法の開発

○Yohei Osada¹, Park Jinhyeong², Shunsuke Tomura³ (1. Osaka Museum, 2. Kyushu Univ., 3. Tokushima Museum)

Many pest species of microlepidoptera injuring useful fungi are well known. However, these pest species are difficult to identify species. For pest control, correct identification on each species is required. In order to provide basic information on the pest control, we worked on development of discrimination method. In this poster session, discrimination method for the pest species of microlepidoptera based on morphology and molecule is shown.
