**Abstract**

AI is no longer the future—it's the present. International educators are navigating an increasingly complex landscape of student recruitment, engagement, admissions, and advising. How can AI be leveraged to enhance efficiency, improve decision-making, and create more personalized experiences for students?

This hands-on, immersive session will take participants beyond the theory of AI and provide real-time experience with cutting-edge AI-powered tools designed to assist in their day-to-day work. Attendees will not only gain insight into the latest advancements but also learn practical ways to implement AI for recruitment, student engagement, and administrative tasks.

By the end of this engaging and interactive session, participants will walk away with first-hand experience using AI tools and a roadmap for integrating AI into their workflows—without needing to be tech experts.
